

We have made some more changes to the Multicategories Component for Joomla!1.5. Here is the Changelog for version 1.0.7:

- new option "Add Category to article links" added which if disabled allows keep links to one article located in several categories unchanged preventing conflicts with search engines (this was discussed in our [Multicategories Component for Joomla!1.5 FAQ Forum](#) );
- JoomFish support added (thanks to blatte for contribution);
- RSS feed support added;
- Call-time pass-by-reference has been deprecated ERROR fixed (this was discussed in our [Multicategories Component for Joomla!1.5 Bugreports Forum](#) );
- many other minor bugs fixed.

Go to the [Multicategories Component for Joomla!1.5](#) project page to download the last version.
